relates to an image forming apparatus, a failure judgment method, and a failure judgment
program product. More particularly, the present invention relates to an image forming apparatus,
a failure judgment method, and a failure judgment program product that can easily reduce the
possibility of a failure causing a short-circuit of a power supply unit. 2. Description of the Related
Art Conventionally, some image forming apparatuses that form images by electrically transferring
a toner image formed by supplying a developing agent to a surface of a photoconductor having an
electrostatic latent image formed thereon are provided with a power supply unit. One of such
apparatuses is an image forming apparatus for developing a latent image formed on a surface of a
photoconductor by supplying a developing agent to the surface of the photoconductor to form a
toner image on the surface of the photoconductor, transferring the toner image formed on the
photoconductor to a sheet of paper, and fixing the toner image on the sheet of paper by heating
and pressing the sheet of paper on which the toner image is transferred to thereby form an image
on the sheet of paper. In this type of image forming apparatus, if the power supply unit provided
on the apparatus fails to provide stable power supply, the image forming operation may
