CRACK Lectra Modaris V8R2 (EXPERT) and Diamino V6R2 SP7 (EXPERT) Hey! Not even 2 months have passed since I sat down at the "computer" again. I hope it's good this time! Firstly, I want to say a big thank you to everyone who contributed to this thread!!! Thanks!!! Special thanks to vovan4ik (y) for not being too lazy, but spending his time and writing everything in such detail that even everything became clear to me !! I think many will be interested in how I solved the problem with CRACKLATEXMODLIM. So, in order: 1. Download everything you need from the Internet. 2. I run the program to edit the configuration (if you didn't know, the program that makes CRACKLATEXMODLIM is called CRACKLATEXMODLIM) and I get an error. I thought for a long time what was the matter, until I looked into the root of my C drive. And this is what I saw there This meant that CRACKLATEXMODLIM could not write modified files. But

as recently as 3 days ago I was working with the program, and everything was fine! Why this happened, I could not understand. But I still didn't give up! And I decided to check if the program has a file update function. It turned out that there is! Well, here is the result: These were my files that I edited. I saved them in a different folder. And then I just deleted these files from the program, and everything started working! The truth is not very good. And I thought that the whole point might be that I tried to edit them earlier, but did not save them. And I decided that I needed to return them to the folder where they were before. Here's what came out of it:
